Series TDDT 04278

Base Unit Manufacturer’s Suggested List Price (MSLP) $1298.00

The Series TDDT 04278 is designed to collect dust and debris from work processes that are performed on the partially enclosed work surface. Particles produced during the process are drawn away from the worker into the filtration system. Heavier particles, chips and dust fall into the collection bag attached to the bottom of the work surface.

The Series TDDT 04278 is in a 16GA. painted metal cabinet with a 2 speed blower that draws 460 CFM (13 CMM) on High and 350 CFM (9.9 CMM) on Low. The work surface is viewed through a Lexan view window and the cabinet is on casters for easy mobility. The clean air is discharged against the floor to prevent drafts. An 8FT power cord is used to plug into 120VAC with 3.5 AMPS of current draw.

Floor Weight 117LBS. (53.1 K.G.)
Shipping 165LBS. (74.8 K.G.)
